### LENGTH OF TRANSMISSION LINE

This chart gives the actual length of line in centimeters and inches when given the length in electrical degrees and the frequency. The length is given on the  $L$  scale intersection by a line between  $\lambda$  on  $l^\circ$ .

$$\text{Example: } f = 600 \text{ mc } (\lambda) \quad l^\circ = 300$$

$$\text{Length } L = 1.68'' \text{ or } 4.2 \text{ cm}$$
